**GETECH Secures Significant PO from Memory Manufacturer**

**SINGAPORE — September 2015** — GETECH, the worldwide leader in PCB automation and depaneling, is pleased to announce receipt of a significant PO from a Tier One Memory Manufacturer for its Asian facilities. The order covers the development and delivery of a series of machines designed to increase productivity and production consistency.

1. MEASUREMENT, PACKING & SORTING WORKCEL (FOR SOLID STATE DEVICE)
2. MEASUREMENT, PACKING & SORTING WORKCELL (FOR MEMORY MODULE)

The system is designed and capable of PCBA dimensional measurement; it will identify cross out and reject boards and perform sorting and packing into trays. The system also employs a flexible robotic arm combined with multiple servo driven axis for parts and tray handling. With multiple megapixel cameras, the system performs PCBS post routing dimensional measurement and ID Label alignment and position detection.

- Perform dimensional measurement on routed SSD, DIMM & SoDIMM (modules),
- Real time measurement and recording of measured data
- Automatic pick and place of good modules to Micron's process tray
- Differentiate and segregate reject module into reject tray
- Differentiate and segregate out cross-out boards module into waste bin
- Differentiate and segregate out misaligned labels into reject tray

These systems contribute to higher quality and overall efficiency, save time on labor and are available 24/7.

**About GETECH**

**Getech Automation** was established in 1992 to focus on developing and manufacturing machines and systems to meet key needs of the PCBA and Semi-conductor industries. Today, Getech has evolved to become a major producer of machinery and automation systems used by PCBA and Semiconductor companies. Every machine and system delivers the highest degree of productivity while ensuring product quality and integrity. However, Getech's expertise extends beyond the world of electronics to include systems delivered to governmental

agencies and corporate clients involved with Pharmaceutical delivery and munitions manufacture. Getech is certified as a **Quality Standard ISO 9001:2008** company and has experience building machines to meet both CE and SEMI standards.
